

Company information

Continues to communicate innovative information for more than 100 years, Kosakai aspires to ensure relationship between customers.

KOSAKAI CHEMICAL INDUSTRY CO., LTD.

6/2024

Message from CEO

Thank you very much for your continued support and business.

Kosakai was founded in Nihonbashi in the early 1990s as a pharmaceutical wholesaler, but with the development of the food industry after World War II, we shifted our business to food additives as our main products, and now we are doing business with a wide range of customers in the food manufacturing industry, focusing on products related to the food industry.

We have been in business for more than 100 years, and I am the fourth president of the company. Although I am new president to the company, I am determined to devote myself to our business, valuing our history and our relationships with our customers, and placing first priority on earning the trust of our customers.

In addition, just as our business has transformed with the times, I would like to flexibly adapt to the changes of the times while continuing to carry on Japan's wonderful food culture that is safe and secure. I will also focus on creating a system that will enable our employees to take on new challenges to achieve this goal.

We recognize that it is our important mission to nurture high-quality employees who can serve as a bridge between the needs of our suppliers and the needs of our customers, with the cooperation and support of our suppliers. So that we can help further develop Japan's food culture into a better future while respecting the attention it is receiving from overseas.

As a bridge between our clients and customers, we aim to be needed by both parties, and we will continue to strive to provide qualified and innovative information and products related to food ingredients and additives, with an emphasis on safety and compliance, as a matter of course.

We look forward to your continued patronage and support.

Kosakai Chemical Industry Co., Ltd.

Hirohito Kosakai

Corporate Creed

Quality, Character, and Dignity

1. Provide products with "high quality"

Kosakai discovers and selects high quality products, provides accurate information to the customers. Kosakai's main phone number "4701" means "high quality product is the best product" in Japanese.

2. Cultivate employees' "character"

Kosakai's employees behave fairly, not arrogantly, humbly, and respect customers, suppliers, supervisors, subordinates, and colleagues.

3. Strengthen Company's "dignity"

Kosakai fosters trust from society.

Our products

Featured products

1. Peracetic acid (PAA) The bactericide

About peracetic acid(PAA)

Peracetic acid(PAA) is the bactericide which is approved as the food additive on October 2016.

2. Products for preventative measures against COVID

CO₂ ventilation environmental sensor

11 x 17" (A3) size wall-mountable CO₂ sensor

Non-contacting surface thermometer touch panel device

Easily installed device with temperature measurement error less than ±0.3°C.

Partitions

Recyclable paper partitions, acrylic partitions and partitions made with PET.

Disinfection cloths

Nonwoven fabric soaked with alcohol preparations packed in the bucket-type container difficult to evaporate.

3. SDGs conscious products

Improve preservability

Extend time limits of Best before dates or expiry dates.

Improve deliciousness

Make foods taste better and improve appetites.

Utilize manufacturing by-products

Utilize manufacturing by-products.

Premixed preparations

Avoid raw material losses during manufacturing.

Nutritional Enhancer

Additives that enhance nutritional content.

Food Allergy Support

Proposals for food-allergy friendly products.

Our products

Our products by categories

1. Food additives

- Sweetener
- Coloring
- Preservative
- PH adjuster
- Thickening stabilizer
- Antioxidant
- Enzyme
- Acidulant
- Emulsifier
- Strengthening agent
- Phosphate
- Fragrance
- Lye water

2. Seasonings

- MSG
- Nucleic acid
- Yeast extract
- Fermented seasoning

3. Sweetener

- Glucose
- Fructose glucose liquid sugar
- Sorbit
- Reduced malt syrup
- Powdered malt syrup
